Morning, in bloom.

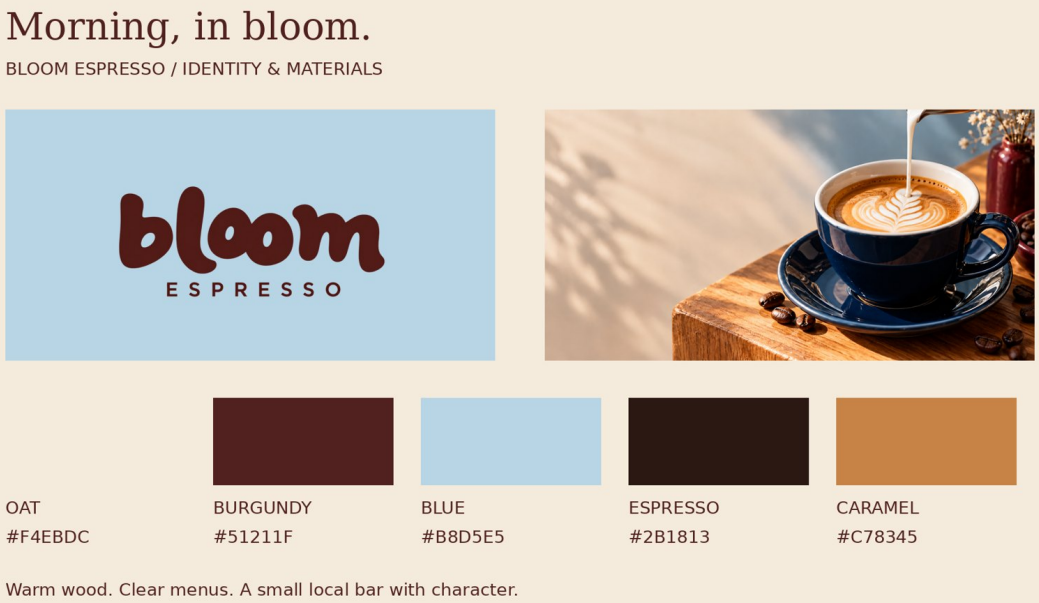

From the bean to the first cup. The morning ritual becomes an editorial sequence, with tactile coffee, warm wood and a clear local identity.

A powder-blue accent and burgundy lettering connect the proposal to the existing Bloom profile.

The kit is a creative direction for later construction, not a published website.

Identity / Warm and recognisable

The rounded bloom signature is reconstructed from the supplied profile image, with an ESPRESSO descriptor. It is interpretative, not the official source vector.

The logo PNG has genuine transparency. Preserve proportions and use a light or powder-blue plate on deep backgrounds.

Oat #F4EBDC, burgundy #51211F, blue #B8D5E5, espresso #2B1813 and caramel #C78345.

Desktop / A useful story

Hero / coffee / menu / food / our corner / visit. Strong image scale and typography guide the reader toward the menu and location.

Coffee-layer diagrams adapt the wall-menu reference into something interactive and useful.

Use 03-secoes-copy-en.md as canonical content. Mockup text and photographs are visual guidance. No prices or stock status are invented.

Mobile / The first cup

A short hero with two clear actions: menu and directions. Keep the latte art visible and the headline separate from the main object.

Use the vertical hero asset for narrow screens. Coffee choices work as a list or two-column cards with readable labels.

Limit the animation to macro and cup; reduced-motion users see static content immediately.

Motion / Bean, cup, layers

01 / The bean

0–18% · Macro

02 / Aperture

18–40% · Mask

03 / The cup

40–60% · Reveal

04 / Layers

60–84% · Illustrative menu

05 / The morning

84–100% · Handoff

06 / Our corner

Location · Treated photograph

0-18%: warm light reveals the bean groove.
18-40%: a rounded mask introduces the cup.
40-60%: latte art and the full composition appear.

60-84%: the cup hands over to menu diagrams.
84-100%: diagrams settle into the page grid.

2D masks and crossfades create continuity. A camera orbit or physically animated pour needs additional film/3D production.

Menu / A clear visual language

Four editable diagrams: espresso, flat white, latte and iced latte. Layer groups can separate on selection or focus.

Ingredients are schematic, without exact quantities. They do not claim to reproduce the business recipe.

Food, retail and gifting come from supplied menu categories. The current menu remains the source for price, ingredients and availability.

Our corner / Keep it real

49 French Street, Pimlico QLD 4812. The facade here was treated from the supplied real photograph to remove screenshot UI. Compare with the original before documentary use.

The grand interiors in inspiration images guide materials only; they are not presented as the Bloom premises.

Email: coffee@bloomespresso.com.au. Hours in the supplied screenshot: weekdays 6am-noon; weekends 7am-noon. Reconfirm before publication.

Production / Ready to assemble

Build the static page first. Then connect the reversible scroll sequence and interactive diagrams.

The menu CTA uses the supplied official site. Its exact checkout link was not retrieved; do not invent one.

The offline study illustrates 2D timing and ingredient layers. Browser visual review remains part of implementation.

Original PNGs, alpha layers, vectors, copy and references are included. Optimize responsive exports when building the site.
